Having trouble logging in?

No problem! If you're an employee, your username is most likely your email address, but your manager may have set you up with a custom username. If you're not sure, check with your manager first.

- If your manager gave you a custom username, they should have also given you a password.
- Otherwise, you should have received an email from TimeForge with a link to set up your password.

If you need help, contact your manager or reach out to our friendly Support Team.

💡 If you've already set up a secret question and answer, you can reset your own password anytime.
